

## Enhance access to sustainable and effective health services Project

It aims to contribute to improving health status and life-saving interventions by providing quality Minimum Services Package (MSP) of health for the most vulnerable populations in both Lahj and Taiz governorates. The project through four health facilities and one mobile medical team provide MSP of Primary Health Care (PHC) including Integrated Management of Childhood Illness (IMCI), Expanded Program of Immunization (EPI), and Reproductive Health (RH) services.
